## Mount Installation

**Note**

The installation instructions that are contained in this manual refer only to the RTM-L. The installation instructions for the various bases that are used with the RTM-L will be included with those products.

**Note**

Prior to installing the RTM-L, the mounting configuration must already be assembled (base, support poles, etc.).

1. Slide the mounting block over and down the support poles.

2. To secure the mounting block to the support poles, tighten the four set screws (located on each side of the mounting block), using the 5/32" Allen wrench (supplied).

## Universal Mounting Bracket Assembly

1. Place the universal bracket bar and the universal brackets on a flat surface.
2. Slide the universal brackets onto the universal bracket bar (as shown below) with the set screws facing up. At this time, do not tighten the set screws that are located on the universal bracket.

**Note** If you have an un-even mounting surface, or a recessed mounting point, place the appropriately sized nylon washer between the display and the universal mounting brackets (page 5).

3. Place the display on a soft, flat surface, face-down. Next, place the universal bracket assembly on the back of the display, with the universal brackets resting directly over the display mounting points.
4. Once the desired position has been determined, place the Griplate™ washers over each mounting point and secure them using the appropriate hardware (see Page 4 and 5).

**Note** For the two upper mounting points, the Griplate™ flat side must be facing up. For the two lower mounting points, the Griplate™ flat side must be facing down.

5. At this time, center the universal bracket bar and tighten the set screws that are located on the universal brackets.

**WARNING** IT WILL TAKE TWO PEOPLE TO COMPLETE THE NEXT INSTALLATION STEP.

**WARNING** THE CONFIGURATION THAT THE UNIVERSAL MOUNTING BRACKETS ARE IN ABOVE MUST REMAIN THE SAME. ANY DEVIATION FROM THE LAYOUT ABOVE COULD AFFECT THE OPERATION OF THE MOUNT.

6. Lower the universal bracket bar and display into the cradle (as to the left).

**Note**

The circular portion of the universal bracket bar must rest inside the nylon sleeve. If seated improperly, the operation of the RTM-S will be hindered and the nylon sleeve will become damaged.

## Display Orientation

The RTM-L will allow the user to adjust the display a full 360°.

### WARNING

BEFORE ROTATING THE RTM-L, MAKE SURE THAT THE M6 KNURL KNOB IS SECURELY FASTENED TO THE RTM-L. ALSO, PLEASE MAKE SURE YOU ALLOW ENOUGH CABLE AND WIRE CLEARANCE FOR FULL ROTATION.

1. To adjust the RTM-L, rotate the display either clockwise or counter-clockwise.

2. Tighten the two Phillips head locking screws.

## Tilt Positioning

The RTM-L is shipped with the hand crank in the storage position. The hand crank must be removed in order for the RTM-L to be adjusted. After the adjustments have been made, return the hand crank to the storage position. If the hand crank is not returned to the storage position, it may cause damage to the unit or other equipment. Please return the hand crank to the storage position after operation.

Rotate the crank handle to tilt the RTM-L:  
Down - Clockwise  
Up - Counter-Clockwise

The RTM-L has the ability to tilt 10° down.

The RTM-L has the ability to tilt 35° up

1. Once the position has been locked down, use an Allen wrench to take off the crank handle.
2. Once the crank handle has been removed, re-attach the crank handle, but in the opposite direction from what it was. This is the storage position for the handle.
